

HISTORY OF CONTEMPORARY ARCHITECTURE

THE WESTERN CONTRIBUTION

(AND BEYOND...)

Prof. Mario Bevilacqua
Prof. Lorenzo Ciccarelli

The course outlines the development of Western architectural languages and urban forms from early modern Italy to the globalized 21st century, focusing on architects and monuments, and issues of cultural cross-relations. Special attention is dedicated to the role of Italian and Western models in 19th and 20th century design and urban planning.

A multidisciplinary approach emphasizes different interpretations of architecture, and their development over the centuries, from the birth of the discipline to our days.

A basic knowledge of the language of classical architecture and theories is required.

The course includes lectures, guided readings, on-site visits in Florence and other Italian centres.

Final exam: written paper, and interview on the following topics:
